

Essay Writing Topic 1

Global warming is a serious problem. Temperatures are
rising every year. This is causing glaciers to melt and sea
levels to rise. Tuvalu is an example of a country that is soon
going to disappear under water. On the other hand, a lack of
water is causing major problems elsewhere. Right now,
wildfires are burning all across Australia. Miles of forests
have burned, and millions of animals have died. A young
Swedish girl is working hard to convince people to change
their lifestyles so that we can stop global warming. We may
have to give up some luxuries, but if we can save our planet,
it will be worth it. (110 words)

Essay Writing Topic 2

A really great day was Christmas Day when I was eight.
On Christmas Eve I was very sad because my cat, Mio, had
disappeared two weeks before. It happened when my family
was away from home and a big storm hit our town. Since Mio
was alone, she became very frightened and ran out the small
cat door. Now two weeks had passed and there was still no
sign of her. I was completely miserable. But the next morning
I received the best Christmas present when Mio miraculously
came back. The moment when I saw Mio standing outside our
front door was the greatest day for me. (107 words)
